Report of Independent Auditors

To the Board of Trustees of Washington University

In our opinion, the accompanying statements of financial position and the related statements of activities and cash flows present fairly, in all material respects, the financial position of Washington University (the "University") at June 30, 2010 and 2009, and the changes in its net assets and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the University's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 4 to the accompanying financial statements, the University changed the manner in which it accounts for endowments to comply with the Uniform Prudent Management of Institutional Funds Act ("UPMIFA") enacted during the year ended June 30, 2010.

Washington University

Notes to the Financial Statements

June 30, 2010 and 2009

(All amounts in thousands of dollars)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

Washington University in St. Louis (the University), is an institution of higher education that, in furtherance of its role as a charitable and educational institution, engages in various activities, including instruction, research and provision of medical care.

Basis of Presentation and Use of Estimates

The financial statements have been prepared on the accrual basis of accounting. The consolidated financial statements include the accounts of the University and its affiliates. Certain prior year amounts presented in the financial statements have been reclassified to be consistent with the basis of presentation in the current year. The Statement of Cash Flows for the year ended June 30, 2009 has been modified to present student loan activity as investing activities rather than operating activities. The effect of the modification was to increase net cash provided by operating activities and net cash used in investing activities by \$4,361. The University has performed an evaluation of subsequent events through September 21, 2010, which is the date the financial statements were issued.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Such estimates include, but are not limited to, the estimated useful lives of buildings and equipment, the fair value of certain investments, the degree of precision in calculation of self-insurance reserves and adequacy of allowances for doubtful accounts receivable. Actual results could differ from those estimates.

Net Assets

Resources are classified for accounting and reporting purposes according to externally (donor) imposed restrictions. Descriptions of the net asset categories follow.

Unrestricted net assets are free of donor imposed restrictions.

Temporarily restricted net assets consist of gifts and related earnings that are subject to donor-imposed restrictions or legal stipulations that have not yet been met by actions of the University and/or passage of time.

Permanently restricted net asset balances include gifts and trusts which, by donor restriction, are required to be held in perpetuity.

Revenues from sources other than contributions and investment returns are reported as increases in unrestricted net assets. Contributions are reported as increases in the appropriate category of net assets, except that contributions which impose restrictions that are met in the same fiscal year they are received are included in unrestricted revenues. Gains and investment income that are limited to specific uses by donor-imposed restrictions are reported as increases in unrestricted net assets if the restrictions are met in the same reporting period as the gains and income are recognized, except for gains and investment income earned by investment of donor-restricted endowments. Such amounts are not reported as unrestricted net assets until appropriated for expenditure by the Asset Management Committee of the Board of Trustees. When a donor restriction expires, temporarily restricted net assets are reclassified to unrestricted net assets and

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

reported in the Statements of Activities as net assets released from restrictions. Permanently restricted gifts received are reported in the non-operating section of the Statements of Activities. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted support. Absent explicit donor stipulations about how long those long-lived assets must be maintained, the University reports expirations of donor restrictions when the donated or acquired long-lived assets are placed in service. Expenses are reported as decreases in unrestricted net assets.

Temporarily and permanently restricted net assets are for the following purposes. See footnote 4 for discussion of increase in temporarily restricted net assets.

	2010		2009	
	Temporarily Restricted	Permanently Restricted	Temporarily Restricted	Permanently Restricted
General activities	\$ 1,405,613	\$ 931,069	\$ 160,353	\$ 793,249
Student assistance	291,912	216,278	9,422	202,603
Buildings and renovations	242,550	134,529	47,273	120,894
Life income	9,642	28,197	7,880	18,576
Total	\$ 1,949,717	\$ 1,310,073	\$ 224,928	\$ 1,135,322

Investments

Investment gains/(losses) in excess of endowment spending distribution and the unrealized appreciation (depreciation) on investments are reported in the non-operating section of the Statements of Activities. Investments acquired by gift or bequest are initially recorded at market or appraised value at the date so acquired.

At June 30, 2010 and 2009, investments include \$12,416 and \$16,990, respectively, which were purchased with unexpended proceeds from the Series 2009A and Series 2008A Missouri Health and Educational Facilities Authority (MOHEFA) revenue bonds in 2010, and the Series 2008A and Series 2007A in 2009. These funds may only be expended for specific construction project costs and costs of issuance related to the MOHEFA bonds.

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

Fixed Assets

Fixed assets are stated at cost or fair market values assigned at dates of gifts, less accumulated depreciation, computed on a straight-line basis over the estimated useful lives of the assets. The cost and accumulated depreciation of fixed assets are removed from the records at the time of disposal. Gains and losses on fixed asset disposals are reported in the non-operating section of the Statements of Activities. Fixed assets by classification at June 30, 2010 and 2009 consist of the following:

	<u>2010</u>	<u>2009</u>
Construction in progress	\$ 271,671	\$ 241,313
Land and improvements to land	83,935	80,050
Buildings	2,515,000	2,381,088
Equipment	<u>432,515</u>	<u>397,884</u>
Total cost	3,303,121	3,100,335
Accumulated depreciation	<u>(1,397,612)</u>	<u>(1,276,911)</u>
Total, net	<u>\$ 1,905,509</u>	<u>\$ 1,823,424</u>

Collections

In addition to the Mildred Lane Kemper Art Museum, the University archives rare book collections, works of art, literary works, historical treasures and artifacts. These collections are protected and preserved for public exhibition, education, research and the furtherance of public service. They are neither disposed of for financial gain nor encumbered in any manner. Accordingly, such collections are not recognized or capitalized for financial statement purposes. Purchases of collection items totaling \$177 and \$24 were expensed in 2010 and 2009, respectively. Sales of collection items totaled \$6 and \$804 in 2010 and 2009, respectively.

Student Loans

Loans are made to students utilizing gift and University resources designated for that purpose and from funds provided by the United States government under the Federal Perkins and Health Professions Student Loan programs. While loan funds are reported at estimated realizable value, it is not practical to determine the fair value of loan fund receivables, which are comprised largely of federally sponsored student loans. They have significant government restrictions as to marketability, interest rates, and repayment terms. Federal funds are ultimately refundable to the government and are recognized as a liability in the Statements of Financial Position.

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

Tuition and Financial Aid

Undergraduate students receive financial aid based upon demonstrated financial need and academic promise. Graduate students often receive tuition support in connection with research assistant, teaching assistant and fellowship appointments. Total financial aid granted to students by the University, including aid provided to employees and their dependents, was \$227,591 in 2010 and \$213,344 in 2009. The table below identifies student aid by type. Scholarships are reported net against tuition in the Statements of Activities. Other amounts are reported as expenses.

	2010	2009
Scholarships from unrestricted sources	\$ 121,457	\$ 110,462
Scholarship support from gifts, endowment and other restricted sources	<u>34,440</u>	<u>33,407</u>
Total scholarships	155,897	143,869
Employee and dependent tuition benefits	24,196	23,755
Stipends	44,673	43,136
Work study	<u>2,825</u>	<u>2,584</u>
Total	<u>\$ 227,591</u>	<u>\$ 213,344</u>

Contributions

Contributions, including unconditional promises to give, are recognized as revenues in the period the promise is received. Contributions received for capital projects, permanent endowments or perpetual trusts are reported as non-operating revenues. Contributions of assets other than cash are recorded at their estimated fair value at the date of gift.

Gifts and conditional promises to give are not recognized until the conditions on which they depend are substantially met. Contributions, in the form of unconditional promises to give, to be received after one year are discounted at a risk-free rate for years prior to 2009. For subsequent years, the rates used are credit-adjusted tax exempt borrowing rates in accordance with the *Fair Value Measurements* standard. Pledges outstanding are discounted with rates ranging from 0.7% to 5.1%. Amortization of the discount is recorded as contribution revenue. Allowance is made for uncollectible unconditional promises to give based upon management's judgment, past collections experience and other relevant factors.

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

A summary of pledges receivable at June 30 is as follows:

	2010	2009
In one year or less	\$ 121,734	\$ 88,498
Between one year and five years	138,497	73,954
Five or more years	22,042	2,511
	<u>282,273</u>	<u>164,963</u>
Less:		
Discount	(4,497)	(4,190)
Allowance for uncollectible amounts	(9,756)	(9,409)
Total	<u>\$ 268,020</u>	<u>\$ 151,364</u>

Patient Services Revenue

The University recognizes revenues in the period in which services are rendered. The University has agreements with third-party payers that provide for payment to the University at amounts that are generally less than its established rates. Accordingly, patient revenue is reported net of contractual allowances, at estimated net realizable amounts from patients, third-party payers and others for services rendered.

Tuition and Fee Revenue

Tuition and fee revenue, net of scholarships, is recorded primarily in the fiscal year in which the educational programs are conducted.

Auxiliary Enterprises – Sales and Services

Auxiliary enterprises sales and services revenue is recorded in the fiscal year in which earned. This revenue is composed primarily of on and off campus housing charges, dining services board charges and parking and transportation fees.

Educational Activities – Sales and Services

Educational activities sales and services revenue is recorded in the fiscal year in which it is earned. This revenue is composed of a number of activities including clinical trial revenues, management services and salary reimbursements from affiliated hospitals, consulting, laboratory fees, conference center revenues and revenues from licensing and royalties.

Affiliated Hospital Revenues

Affiliated hospital revenue is recorded in the fiscal year in which earned. This revenue is composed of amounts received from affiliated hospitals for various services as more fully described in note 11.

Sponsored Programs

The University receives grant and contract revenue from governmental and private sources. Revenue associated with the direct costs of sponsored programs is generally recognized as the related costs are incurred. The University records revenue in unrestricted net assets upon its recovery of direct and indirect costs applicable to those sponsored programs that provide for the full or partial reimbursement of such costs. The recovery of indirect costs, also referred to as facilities and administrative costs, is recognized primarily based on predetermined rates negotiated with the federal government through the year ending June 30, 2013.

Washington University

Notes to the Financial Statements

June 30, 2010 and 2009

(All amounts in thousands of dollars)

Operating Results and Allocation of Certain Expenses

The University's measure of operations as presented in the Statements of Activities includes income from tuition and fees, grants and contracts, medical services, contributions for operating programs, the endowment spending distribution and other revenues. Operating expenses are reported on the Statements of Activities by functional categories, after allocating costs for operation and maintenance of plant, interest on indebtedness and depreciation expense. Operating results exclude investment gains/(losses) except for the portion of gains utilized for the endowment spending distribution, permanently restricted gifts, change in the value of split-interest agreements, gains/(losses) on fixed asset disposals and interest rate swaps. Operation and maintenance of plant and depreciation are allocated to functional categories largely based on square footage. Interest expense is allocated based on specific identification of the uses of proceeds. Instruction expenses include instruction, departmental research and patient care costs.

Split-Interest Agreements

The University's split-interest agreements with donors consist primarily of charitable gift annuities and irrevocable charitable remainder trusts for which the University serves as trustee. Assets are invested and payments are made to donors and/or other beneficiaries in accordance with the respective agreements. Contribution revenues for charitable gift annuities and charitable remainder trusts are recognized after recording liabilities for the present value of the estimated future payments to be made to the respective donors and/or other beneficiaries. Historically, the discount rate used to calculate present value was from the IRS table of federal mid-term rates used in calculating the permitted charitable contribution. For 2009 and prospectively, upon adoption of accounting guidance for fair value measurements, the discount rate used is a credit-adjusted rate in existence at the date of the gift. The rates used range from 1.36% to 4.20% for both 2010 and 2009. Annually, the University records the change in value of split-interest agreements by recording at fair value the assets that are associated with each trust and recalculating the liability for the present value of the estimated future payments to be made to the donors and/or other beneficiaries.

Conditional Asset Retirement Obligation

The asset retirement obligation for the University relates primarily to the removal of asbestos from certain of its buildings. Known asbestos sites are appropriately encapsulated or controlled in accordance with current environmental regulations pending ultimate removal. As of June 30, 2010 and 2009, respectively, \$15,306 and \$15,197 of conditional asset retirement obligations are included within accounts payable and accrued expenses in the Statements of Financial Position. Additional obligation recognized, obligation settled, and accretion expense were not material to results reported in the Statements of Activities in any year.

Cash and Cash Equivalents

The University considers cash on hand and in banks and all highly liquid financial instruments with an original maturity of 90 days or less, except those amounts assigned to and invested by its investment managers, which amounts are classified as investments, to be cash and cash equivalents.

Income Taxes

The University is exempt from federal income taxes under Section 501 (c)(3) of the Internal Revenue Code except to the extent the University has unrelated business income. There was no provision for income taxes due on unrelated business income in the current year. The University has no uncertain tax positions that result in material unrecognized tax benefits.

Washington University

Notes to the Financial Statements

June 30, 2010 and 2009

(All amounts in thousands of dollars)

2. FAIR VALUE

The University follows FASB guidance for fair value measurements. This guidance defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

The FASB guidance establishes a hierarchy of valuation inputs based on the extent to which the inputs are observable in the marketplace. Observable inputs reflect market data obtained from sources independent of the University and unobservable inputs reflect the University's assumptions about how market participants would value an asset or liability based on the best information available. Valuation techniques used to measure fair value maximize the use of observable inputs and minimize the use of unobservable inputs. The fair value hierarchy is based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value.

The following describes the hierarchy of inputs used to measure fair value and the primary valuation methodologies used by the University for financial instruments measured at fair value on a recurring basis. The three levels of inputs are as follows:

- Level 1 - Quoted prices in active markets for identical assets or liabilities, such as exchange-traded equity securities.
- Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the same term of the assets or liabilities. Examples of Level 2 include U. S. Treasury securities and corporate bonds.
- Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities including investments in certain hedge and all private equity strategies.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

The following table presents the financial instruments carried at fair value as of June 30, 2010, by caption on the Statements of Financial Position by the valuation hierarchy defined above. Under new accounting guidance issued in September 2009, certain alternative investments, such as hedged strategies, that do not have readily determinable fair values, but are redeemable in the near term at investee-reported net asset value per share or its equivalent, are reportable at Level 2. This guidance has been applied to these types of investments at June 30, 2010. See below for further discussion of this change. Also, included as Level 2 fixed income and short-term investments are U.S. Treasury securities in excess of \$531,000.

	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Balance June 30, 2010
Investments (by strategy):				
Equity	\$ 1,236,476	\$ 453,801	\$ 170,872	\$ 1,861,149
Fixed income	-	785,594	41,680	827,274
Hedged strategies	-	675,713	575,415	1,251,128
Private equity	-	-	685,339	685,339

Total investments at fair value	1,043,945	954,502	2,830,568	4,829,015
Invested assets received from security borrowers	-	207,137	-	207,137
Total assets reported at fair value	\$ 1,043,945	\$ 1,161,639	\$ 2,830,568	\$ 5,036,152

Included as Investments on the Statements of Financial Position, at June 30, 2010 and 2009, respectively, but not reported in the tables above, are accrued investment income of \$7,756 and \$7,421 and investments in affiliates of \$40,193 and \$40,354, which are recorded on the equity basis of accounting. A portion of Level 2 and 3 equity amounts reported above as of June 30, 2010 are in hedge-type strategies and a portion of real assets and other are invested in private-equity-type strategies. Perpetual trusts held by third parties are valued at the present value of the future distributions expected to be received over the term of the agreement. The University has recorded within investments the market value of assets held by third parties in perpetual trusts of \$19,450 and \$18,072 in 2010 and 2009, respectively. Investments also include properties held for strategic growth purposes of \$22,017 at both June 30, 2010 and 2009, which approximates fair value.

Following is a description of the University's valuation methodologies for assets and liabilities measured at fair value. The methods described below may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the University believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Fair value for Level 1 is based upon quoted prices in active markets that the University has the ability to access for identical assets and liabilities. Market price data is generally obtained from exchange or dealer markets. The University does not adjust the quoted price for such assets and liabilities.

Washington University

Notes to the Financial Statements

June 30, 2010 and 2009

(All amounts in thousands of dollars)

Fair value for Level 2 is based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets. Certain alternative investments, such as hedge funds, that do not have readily determinable fair values, but are redeemable in the near term at investee-reported net asset value per share or its equivalent, are also reported at this level. An alternative investment is considered redeemable in the near term if the University has the ability to redeem the investment or a portion thereof up to 180 days beyond the measurement date at NAV. If the redemption extends beyond 180 days, the investment is categorized as Level 3. Inputs are obtained from various sources including market participants, dealers, and brokers.

Fair value for Level 3 is based on valuation techniques that use significant inputs that are unobservable as they trade infrequently or not at all.

Investments included in Level 3 primarily consist of the University's ownership in alternative investments (principally limited partnership interests in hedge, private equity, real estate, and other similar funds). The fair values (Net Asset Value ("NAV") or partner's capital per share) of the securities held by limited partnerships that do not have readily determinable fair values are determined by the respective general partners and are based on appraisals or other estimates that require varying degrees of judgment. If no public market exists for the investment securities, the fair value is determined by the general partners taking into consideration, among other things, the cost of the securities, prices of recent significant placements of securities of the same issuer, and subsequent developments concerning the companies to which the securities relate. The University has performed due diligence with respect to these investments to ensure NAV or partner's capital per share is an appropriate measure of fair value as of June 30. Under new accounting guidance issued in September 2009, alternative investment NAV calculated by the investee in a manner consistent with generally accepted accounting principles for investment companies may be reported as the fair value of the investment. The use of NAV as a practical expedient to determining and reporting of fair value has been applied to the following groups of investments.

Hedged Strategies: Investments in hedged strategies are made in targeted categories of market exposure including event driven, distressed/credit, relative value, long/short, global macro/commodity trading funds and fund of funds. The redemption frequency for these funds varies from monthly to every 3 years. Similarly, the required redemption notice period varies from 3 to 180 days. The total fair value of hedged strategies, including equity investments with a hedge fund structure, held at June 30, 2010 is \$1,829,698. Of this amount, \$123,816 is in side pockets with indeterminate redemption periods. Another \$244,885 is subject to initial investment lock-ups that will expire over the next 3 to 48 months. Some funds subject to lock-up permit early redemptions subject to a fee.

Private Equities: Investments in private equities are made in targeted categories of market exposure including buyout, venture capital, corporate finance, real estate and natural resources. Redemptions of such funds are not permitted and distributions are received as underlying investments are liquidated. The remaining lives of the agreements under which these investments are made vary from 1 to 17 years assuming all extension options under the agreements are exercised and approved. At June 30, 2010, the University had outstanding commitments for investments in private equity partnerships of approximately \$782,937.

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

The following tables roll forward the Statements of Financial Position amounts for financial instruments classified by the University within Level 3 of the fair value hierarchy defined above for the years ended June 30, 2010 and 2009.

	Balance June 30, 2009	Net realized and unrealized gains (losses)	Purchases, sales and settlements, net	Transfers in/(out) of Level 3	Balance June 30, 2010
Investments:					
Equity	\$ 786,494	\$ 123,019	\$ (208,729)	\$ (529,912)	\$ 170,872
Fixed income	5,500	-	36,314	(134)	41,680
Hedged strategies	1,126,998	150,696	(26,567)	(675,712)	575,415
Private equity	565,963	72,252	47,124	-	685,339

3. INVESTMENT RETURN

The following summarizes the return on investments, net of investment management fees. Investment income represents earnings on non-endowed funds.

	<u>2010</u>	<u>2009</u>
Investment income	\$ 9,053	\$ 11,967
Endowment dividends and interest income	\$ 25,270	\$ 39,676
Endowment distribution in excess of income	<u>199,796</u>	<u>190,179</u>
Endowment spending distribution	225,066	229,855
Investment gains/(losses), net	565,986	(1,280,834)
Gains distributed as endowment distribution	<u>(199,796)</u>	<u>(190,179)</u>
Investment returns net of endowment spending distribution	<u>366,190</u>	<u>(1,471,013)</u>
Net investment losses	<u>\$ 600,309</u>	<u>\$ (1,229,191)</u>

At June 30, 2010 and 2009, investments with a fair value of \$104,693 and \$218,200, respectively, were loaned to various brokers for average periods varying from six to seven days or one to three months, depending on the type of loan. The University receives lending fees and continues to earn interest and dividends on the loaned securities. These securities are returnable on demand and are collateralized by cash deposits amounting to 103% of the market value of the securities loaned at June 30, 2010 and 2009. The University is indemnified against borrower default by the financial institution that is acting as its lending agent. The borrowers provided \$108,331 and \$224,375 of cash collateral for the loaned securities at June 30, 2010 and 2009, respectively. Most, if not all, of the cash is reinvested in other vehicles by the lending agent. Such collateral was invested in fixed income securities and had a fair value of \$94,873 and \$207,137 at June 30, 2010 and 2009, respectively.

4. ENDOWMENT

Effective August 28, 2009, the state of Missouri adopted legislation that incorporates the provisions outlined in the Uniform Prudent Management of Institutional Funds Act (UPMIFA). The statutory guidelines contained in this legislation relate to the prudent management, investment, and expenditure of donor-restricted endowment funds held by charitable organizations. Additionally, the legislation specifies factors for fiduciaries to consider prior to making a decision to appropriate from or accumulate into an institution's endowment funds.

Effective July 1, 2008, the University adopted FASB guidance for accounting and reporting of endowments of not-for-profit organizations. At June 30, 2010, the University's endowment consists of 2,605 individual donor-restricted endowment funds and Board of Trustees or management-designated endowment funds for a variety of purposes plus split-interest agreements and other net assets where the assets have been designated for endowment. The net assets associated with endowment funds, including funds designated by the Board of Trustees or management to function as endowments, are classified and reported based on the existence or absence of donor imposed restrictions. With the adoption of UPMIFA and in accordance with accounting guidance, cumulative investment returns, including reclassifications of deficits in donor-designated funds, totaling

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

\$1,469,368 as of July 1, 2009, previously reported as unrestricted, were reclassified as temporarily restricted net assets.

The University has interpreted Missouri UPMIFA as requiring the preservation of the original gift as of the gift date of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, the University classifies as permanently restricted net assets, (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted until the donor-imposed stipulations attached to those amounts have been met by actions of the University and or passage of time and appropriated for expenditure in a manner consistent with the standard of prudence prescribed by UPMIFA.

The University had the following endowment activities during the years ended June 30, 2010 and 2009 delineated by net asset class and donor-restricted versus Board-designated funds:

Washington University

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

Description of Amounts Classified as Permanently Restricted Net Assets and Temporarily Restricted Net Assets (Endowments Only)

Permanently restricted net assets

The portion of perpetual endowment funds net assets that is required to be retained permanently by explicit donor stipulation:

	<u>2010</u>	<u>2009</u>
Restricted for general activities	\$ 812,988	\$ 772,787
Restricted for student assistance	211,288	198,797
Restricted for buildings and renovations	134,529	120,894
Life income	<u>28,197</u>	<u>18,577</u>
Total endowment net assets classified as permanently restricted net assets	<u>\$ 1,187,002</u>	<u>\$ 1,111,055</u>

Temporarily restricted net assets

Temporarily restricted endowment funds net assets:

	<u>2010</u>	<u>2009</u>
Restricted for general activities	\$ 1,295,881	\$ 53,318
Restricted for student assistance	283,306	3,973
Restricted for buildings and renovations	205,859	17,595
Life income	<u>8,510</u>	<u>10,830</u>
Total endowment net assets classified as temporarily restricted net assets	<u>\$ 1,793,556</u>	<u>\$ 85,716</u>

Endowment Funds with Deficits

As determined under UPMIFA, the fair value of assets associated with individual donor-restricted endowment funds may fall below the value of the initial and subsequent donor gift amounts (i.e., deficit). When donor endowment deficits exist, they are classified as a reduction of unrestricted net assets. Deficits of this nature reported in unrestricted net assets were \$21,141 and \$36,660 as of June 30, 2010 and 2009, respectively. The deficits resulted largely from unfavorable market fluctuations that occurred shortly after the investment of newly established endowments.

Return Objectives and Risk Parameters

The University has adopted endowment investment and spending policies that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of endowment assets. Under this policy, the return objective for the endowment assets, measured over a full market cycle, shall be to maximize the return against various indices, based on the endowment's target allocation applied to the appropriate individual benchmarks. The University expects its endowment funds over time, to provide an average rate of return of approximately 8.0% to 9.0% annually. Actual returns in any given year may vary from this amount.

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

Strategies Employed for Achieving Investment Objectives

To achieve its long-term rate of return objectives, the University relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized gains) and current yield (interest and dividends). The University targets a diversified asset allocation that places greater emphasis on equity-based and alternative investments to achieve its long-term objectives within prudent risk constraints.

Endowment Spending Allocation and Relationship of Spending Policy to Investment Objectives

The University has an endowment spending distribution policy designed to stabilize annual spending levels and preserve the real value of the endowment over time. Under this policy, earnings of the pooled endowment are distributed to the schools and other units of the University at a rate set annually by the Asset Management Committee of the Board of Trustees. The Committee also considers the provisions of UPMIFA in determining the amount to appropriate. This spending rate must fall within the range of 3.0% to 5.5% of the five-year average market value of a unit of the pooled endowment. For 2010, the spending rate from the pooled endowment was 5.5% of the beginning market value of the pooled endowment. The spending rate is funded from current earnings and, in years when current earnings are insufficient, from previously accumulated earnings of the endowment.

Based on market values, the total return for the endowment fund investments that are administered by the University was 12.7% in 2010 and (20.5%) in 2009. The University's endowed assets are as follows:

	Fair Market Value at June 30, 2010	Fair Market Value at June 30, 2009
Pooled endowment	\$ 4,448,156	\$ 4,048,945
Life income trusts and pools	81,751	71,007
Externally administered trusts	19,450	18,072
Separately invested endowment	10,686	9,437
Total	<u>\$ 4,560,043</u>	<u>\$ 4,147,461</u>

5. ACCOUNTS AND NOTES RECEIVABLE

Accounts and notes receivable at June 30 were as follows:

	2010	2009
Patient services	\$ 180,659	\$ 171,052
Student and parent loans	136,544	137,502
Due from affiliated hospitals	45,734	53,993
Other	93,929	76,462
	<u>456,866</u>	<u>439,009</u>
Less: Allowance for concessions and doubtful accounts	<u>(101,475)</u>	<u>(97,873)</u>
Total	<u>\$ 355,391</u>	<u>\$ 341,136</u>

6. BONDS AND NOTES PAYABLE

Outstanding principal on bonds and notes payable at June 30, 2010 and 2009 consists of the following:

<u>Missouri Health and Educational Facilities Authority:</u>	<u>Interest Rates at June 30, 2010</u>	<u>Maturity</u>	<u>2010</u>	<u>2009</u>
\$142,400 of 1996A, B, C and D Series Variable Rate Bonds, due in full	0.13% - 0.24%	September 1, 2030	\$ 142,400	\$ 142,400
\$105,770 of 1998A Series Bonds, due in full	4.75% - 5.00%	November 15, 2037	101,529	101,460
\$88,000 of 2000B and C Series Variable Rate Bonds, due in full	0.13% - 0.25%	March 1, 2040	88,000	88,000
\$176,490 of 2001A Series Bonds, due serially from June 15, 2011 to June 15, 2016	5.50%	June 15, 2016	55,245	55,547
\$73,355 of 2001B Series Refunding Bonds, due in full	5.00%	March 1, 2030	72,719	72,700
\$93,430 of 2003A Series Bonds, due in full	5.00%	February 15, 2033	93,255	93,247
\$25,135 of 2003B Series Variable Rate Bonds, due in full	0.13% - 0.25%	February 15, 2033	25,135	25,135
\$100,000 of 2004 Series A and B Variable Rate Bonds, due annually	0.14% - 0.24%	February 15, 2034	90,500	92,600
\$20,780 of 2005A Series Refunding Bonds, due annually	3.00% - 5.00%	February 15, 2022	16,328	17,384
\$104,020 of 2007A Series Bonds, due in full	5.00%	January 15, 2037	111,764	111,910
\$126,975 of 2007B Series Refunding Bonds, due serially from January 15, 2021 to January 15, 2041	4.20% - 4.50%	January 15, 2041	127,315	127,323
\$193,625 of 2008A Series Educational Facilities Revenue Bonds, due March 15, 2018 (\$44,000) and March 15, 2039 (\$149,625)	5.25% - 5.38%	March 15, 2018 and 2039	191,190	191,322
\$93,770 of 2009A Series Educational Facilities Revenue Bonds, due November 15, 2030 (\$20,000) and November 15, 2039 (\$73,770)	4.50% - 5.00%	November 15, 2030 and 2039	98,782	-
Other Notes Payable			40,008	37,086
Total outstanding bonds and notes payable			<u>\$ 1,254,170</u>	<u>\$ 1,156,114</u>

Bonds payable are redeemable at the option of the University at various times from 2010 through 2041. The University is required to maintain certain ratios and comply with other restrictive covenants, principally that the University maintain a ratio of expendable financial resources to debt of at least 1.25 times. The University is in compliance with this covenant. During 2010 and 2009, interest, accretion of debt discount and related fees incurred on notes and bonds payable totaled \$51,463 and \$46,578, respectively.

The other notes payable represent notes payable to Bank of America and the financing obligation discussed below.

Washington University

Notes to the Financial Statements

June 30, 2010 and 2009

(All amounts in thousands of dollars)

Maturities on notes and bonds payable for the next five fiscal years are as follows:

2011	\$	18,360
2012		3,390
2013		3,530
2014		3,670
2015		3,815
Thereafter		1,221,405

During 2005, the University entered into an agreement to provide certain assurances to a financial institution ("lender") to support third party ("builder") construction of a new building to be leased in part by the University. Under terms of the agreement, if after seven years, the builder fails to meet its obligations to the lender to service debt incurred for construction, the University could be called upon to satisfy those obligations. Should this occur, the University has an option to acquire the building for the amount of such unpaid debt service. In addition, the University installed improvements in support of the research activities undertaken in its leased portion of the building. Some of these improvements were determined to be a portion of the cost of constructing the building. The University was deemed to be the owner, for accounting purposes only, of this building project. The terms of the lease are such that the building and offsetting obligation do not qualify for derecognition under sale and leaseback accounting rules, until the 25-year lease term expires. During the lease term, the University will recognize building depreciation, interest expense for the obligation and estimated rental income for the portions of the building leased to third parties. The building cost and obligation increased to \$27,627 at June 30, 2010. Upon full occupancy, the total construction cost is estimated to be approximately \$30,000 before the University's leasehold improvements to space the University will occupy.

The University entered into an agreement with the Missouri Higher Education Loan Authority (MOHELA) for a one-year term beginning with the Academic Year 2008-2009, through June 30, 2009, for the purpose of the University making Stafford Loans to its graduate and professional students. MOHELA extended a line of credit to the University in an aggregate amount not to exceed \$40,000. There are no borrowings outstanding under the line at June 30, 2010. The University used these funds to administer student loans and then sold the loans to MOHELA to relieve the line of credit. The University has other unused lines of credit, which expire annually, aggregating \$171,600 at June 30, 2010.

7. DERIVATIVE AND OTHER FINANCIAL INSTRUMENTS

The University adopted new requirements on disclosures about derivative instruments and hedging activities. This guidance requires that organizations provide disclosure in a tabular format, the Statement of Financial Position captions in which derivatives are reported and the fair value amounts of derivative instruments reported in those captions. Similar disclosures are required for the location and amounts of gains and losses reported in the Statement of Activities.

In accordance with the University's investment policies, derivative instruments may be purchased and sold to manage the risk and return of investment market positions. Investment managers purchase and sell derivatives on various fixed income instruments to control the risk of fluctuations in interest rates, relative to portfolio benchmarks, on the University's fixed income investments. Certain equity investment managers purchase derivatives to obtain cost efficient exposure to equity markets or to hedge currency. These contracts are valued at periodic intervals (daily, monthly,

Washington University

Notes to the Financial Statements

June 30, 2010 and 2009

(All amounts in thousands of dollars)

quarterly, etc.) as well as at June 30, with the resulting changes in the values of the contracts either added to or deducted from the University's custodial account. Gains or losses from these derivative instruments are reported as realized and unrealized gains or losses in the Statements of Activities. The contracts and gains or losses they generate are not significant to the University's financial statements.

The University has investments in certain funds, generally in the form of limited partnerships, that participate directly, or have the option to participate, in derivative instruments. The University regularly reviews the performance of these funds in the context of its overall investment objectives.

In order to reduce exposure to floating interest rates on variable rate debt, the University entered into a thirty-year interest rate swap agreement in 2004 and ten-year interest rate swap agreements in 1998 and 2001. The 1998 swap matured on July 21, 2008. The agreements have the effect of fixing the rate of interest on borrowings, respectively, at approximately 4.26% for \$90,500 of debt, and 5.82% for \$9,980 of debt. The fair value of the swaps is the estimated amount that the University would receive or pay to terminate the agreements at the reporting date, taking into account current interest rates and the current credit-worthiness of the swap counter parties. The fair value of the interest rate swaps, reported on the Investments line of the Statements of Financial Position, was a liability of \$7,146 and \$3,962 at June 30, 2010 and 2009, respectively, and is considered a Level 2 financial instrument under the FASB guidance on fair value measurements. The change in fair value resulted in losses of \$3,184 and \$1,555 in 2010 and 2009, respectively, that are reported in investment returns net of endowment spending on the Statements of Activities. These financial instruments necessarily involve counterparty credit exposure and our own non-performance risk. The counterparties for these swap transactions are major financial institutions that meet the University's criteria for financial stability and credit-worthiness.

8. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount of accrued investment income and accounts and notes receivable approximate fair value because of the short maturity of these financial instruments. The carrying amount of accounts payable and other various accruals approximate fair value because of the short maturity of these financial instruments. The carrying amount of notes and bonds payable with variable interest rates approximates their fair value because the variable rates reflect current market rates for bonds with similar maturities and credit quality. The fair value of notes and bonds payable with fixed interest rates represents the quoted market value. The estimated fair value and carrying amount of all notes and bonds payable at June 30, 2010 approximated \$1,297,731 and \$1,254,170 and at June 30, 2009 approximated \$1,182,817 and \$1,156,114, respectively.

9. COMMITMENTS AND CONTINGENCIES

At June 30, 2010, the University had outstanding commitments under certain construction contracts in the amount of \$31,573.

The University maintains a self-insurance program for professional liability. This program is supplemented with commercial excess insurance above the University's self-insurance retention. Funding for the program reserves is based on claims made. The assets supporting the funded reserve are reported as investments in the Statements of Financial Position. The University also accrues for an estimate of claims incurred but not reported. Reserves, funded and unfunded, are based upon actuarial studies and represent undiscounted estimated claims and related costs. The total self-insurance reserves at June 30, 2010 and June 30, 2009, respectively, were \$61,798 and

Washington University

Notes to the Financial Statements

June 30, 2010 and 2009

(All amounts in thousands of dollars)

\$63,007. Self-insurance reserves are necessarily estimates based on historical loss experience and other factors, and while management believes that the reserves are adequate, the ultimate liabilities may be in excess of or less than the amounts provided.

The University is a party, along with other universities, to an agreement with a captive insurance company and a reciprocal risk retention group for purposes of obtaining general liability and auto liability insurance coverage in excess of a pre-determined retention level. Under the terms of these agreements, the University can be called upon to make additional capital contributions. In management's view, any such capital calls would not be material.

The University is involved in various legal proceedings arising in the normal course of operations. Although the outcome of any legal proceeding cannot be predicted with certainty, it is the opinion of the University's management that the outcome of these proceedings individually or in the aggregate, will not have a material adverse effect on the business, financial position or liquidity of the University.

10. RETIREMENT PLAN

The University provides its faculty and staff with a defined contribution (403(b)) retirement savings plan in which employee contributions, University contributions and investment earnings accumulate to assist employees at retirement. Participating employees own individual retirement accounts through the Teachers Insurance and Annuity Association (T.I.A.A.), College Retirement Equity Fund (CREF), and/or the Vanguard Group, Inc. Under this arrangement, the University and plan participants make monthly contributions to T.I.A.A.-CREF and/or Vanguard. For benefits-eligible employees as of August 31, 2006, the amount of contribution made by the University, commencing after two years of eligible service, is based upon the employee's age and salary. For benefits-eligible employees hired or rehired on or after August 31, 2006, the University contribution commences after two years of eligible service and is based upon the employee's years of eligible service and salary. Vesting provisions are full and immediate. The University's share of the cost of these benefits in 2010 and 2009 was \$56,510 and \$53,939, respectively.

11. AGREEMENTS WITH AFFILIATED HOSPITALS

The University is party to an affiliation agreement between the University, Barnes-Jewish Hospital (BJH), St. Louis Children's Hospital (SLCH), and Barnes-Jewish West County Hospital (BJWCH).

The terms of the affiliation agreements provide for the University to be responsible for providing professional medical staff and direction, supervision of residents and interns, appropriate resources for research and medical education, and participation in joint clinical planning. BJH, SLCH and BJWCH are responsible for the hospitals and health care delivery facilities. BJH, SLCH and BJWCH compensate the University for services provided by the University through a fixed annual base payment (adjusted annually for inflation) and an additional, contingent payment equal to a share of the combined BJH, SLCH and BJWCH adjusted net operating income. The combined revenue is reported as affiliated hospital revenue on the Statement of Activities. The University has an agreement with SLCH to lease space to the University through December 31, 2010. The rental payments to SLCH for 2010 and 2009 were \$759 and \$737, respectively, and vary annually based on a formula defined in the agreement. There are also agreements between BJH and the University for leased space. Rental payments to BJH in 2010 and 2009 were \$5,987 and \$5,741, respectively. Rental payments received from BJH in 2010 and 2009 were \$2,786 and \$2,680, respectively.

Washington University
Notes to the Financial Statements
June 30, 2010 and 2009

(All amounts in thousands of dollars)

The University, on behalf of its Medical School (WUSM), and BJH entered into an agreement in 2006 to develop and manage the Orthopedic Center (OC) in Chesterfield, Missouri, to accommodate changes in the health care environment and to enhance their individual and shared missions of patient care, research and medical education. WUSM provides supervision and medical direction for BJH medical education programs including management, supervision and oversight of clinical services and research at OC. All professional fee revenue and expense accrues to WUSM. WUSM exercised an option to purchase the entire site and sold an undivided interest in it to BJH, with the result that the University and BJH own the facility as tenants in common. BJH occupies the space it owns and provides the technical services components of OC. The annual operating income or loss from the technical services component of OC is combined with BJH, SLCH and BJWCH adjusted net operating income for the additional payment under the affiliation agreements.
