Washington University
Consolidated Financial Statements
June 30, 2016 and 2015
Report of Independent Auditors

To the Board of Trustees of Washington University:

We have audited the accompanying consolidated financial statements of Washington University and its subsidiaries (the “university”), which comprise the consolidated statements of financial position as of June 30, 2016 and June 30, 2015, and the related consolidated statements of activities and cash flows for the years then ended.

Management’s Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the university’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the university’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Washington University and its subsidiaries as of June 30, 2016 and June 30, 2015, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

The accompanying notes are an integral part of these consolidated financial statements.
Washington University  
Notes to the Consolidated Financial Statements  
Years Ended June 30, 2016 and 2015

(All amounts in thousands of dollars)

1. Summary of Significant Accounting Policies

Organization
Washington University in St. Louis (the “university”), is an institution of higher education that, in furtherance of its role as a charitable and educational institution, engages in various activities, including instruction, research and provision of medical care.

Basis of Presentation and Use of Estimates
The consolidated financial statements have been prepared on the accrual basis of accounting. The consolidated financial statements are consolidated to include the accounts of the university and its affiliates.

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Such estimates include, but are not limited to, the estimated useful lives of buildings and equipment, the fair value of certain investments (see footnote 2), the degree of precision in calculation of self-insurance reserves and adequacy of allowances for doubtful accounts. Actual results could differ from those estimates.

Net Assets
Resources are classified for accounting and reporting purposes according to externally (donor) imposed restrictions. Descriptions of the net asset categories follow:

- **Unrestricted net assets** are free of donor-imposed restrictions.

- **Temporarily restricted net assets** consist of gifts and related earnings that are subject to donor-imposed restrictions or legal stipulations that have not yet been met by actions of the university and/or passage of time.

- **Permanently restricted net asset balances** include gifts and trusts which, by donor restriction, are required to be held in perpetuity.

Revenues from sources other than contributions and investment returns are reported as increases in unrestricted net assets. Contributions are reported as increases in the appropriate category of net assets, except that contributions which impose restrictions that are met in the same fiscal year they are received are included in unrestricted revenues. Gains and investment income that are limited to specific uses by donor-imposed restrictions are reported as increases in unrestricted net assets if the restrictions are met in the same reporting period as the gains and income are recognized, except for gains and investment income earned by investment of donor-restricted endowments. Such amounts are not reported as unrestricted net assets until appropriated for expenditure. When a donor restriction expires, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the Consolidated Statements of Activities as net assets released from restrictions. Permanently restricted gifts received are reported in the non-operating section of the Consolidated Statements of Activities. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted support. Absent explicit donor stipulations about how long those long-lived assets must be maintained, the university reports expirations of donor restrictions when the donated or acquired long-lived assets are placed in service. Expenses are reported as decreases in unrestricted net assets.
Temporarily and permanently restricted net assets are for the following purposes.

<table>
<thead>
<tr>
<th></th>
<th>Temporary Restricted</th>
<th>Permanent Restricted</th>

</tr>
</tbody>
</table>

**Investments**
Investment gains/(losses) in excess of endowment spending distribution and the unrealized appreciation (depreciation) on investments are reported in the non-operating section of the Consolidated Statements of Activities. Investments acquired by gift or bequest are initially recorded at market or appraised value at the date so acquired.

At June 30, 2016, investments include $26,775, purchased with unexpended proceeds from the Series 2016 A, Series 2014 A, and Series 2012 A Missouri Health and Educational Facilities Authority (MOHEFA) revenue bonds issued in February 2016, August 2014 and July 2012, respectively. At June 30, 2015, investments include $24,082, purchased with unexpended proceeds from the Series 2014 A and Series 2012 A Missouri Health and Educational Facilities Authority (MOHEFA) revenue bonds issued in August 2014 and July 2012, respectively. These funds may only be expended for specific construction project costs and costs of issuance related to the MOHEFA bonds.

**Fair Value of Financial Instruments**
The carrying amount of accrued investment income, accounts receivable, accounts payable and other various accruals approximate fair value because of the short maturity of these financial instruments. The carrying amount of notes and bonds payable with variable interest rates approximates their fair value because the variable rates reflect current market rates for bonds with similar maturities and credit quality.
Fixed Assets
Fixed assets are stated at cost or at fair market values if received as a gift, less accumulated depreciation, computed on a straight-line basis over the estimated useful lives of the assets. Fixed assets include equipment and other assets acquired through sponsored programs during which title is retained by the resource provider. It is probable the university will be permitted to keep the assets when the program terminates. The cost and accumulated depreciation of fixed assets are removed from the records at the time of disposal. Gains and losses on fixed asset disposals are reported in the non-operating section of the Consolidated Statements of Activities. Fixed assets by classification at June 30, 2016 and 2015 consist of the following:

Collections
In addition to the Mildred Lane Kemper Art Museum, the university archives rare book collections, works of art, literary works, historical treasures and artifacts. These collections are protected and preserved for public exhibition, education, research and the furtherance of public service. They are neither disposed of for financial gain nor encumbered in any manner. Accordingly, such collections are not recognized or capitalized for financial statement purposes.

Financing Receivables
Financing receivables are principally loans made to students or their parents utilizing gifts, endowment payout, and university resources designated for that purpose and from funds provided by the United States government under the Federal Perkins and Health Professional Student Loan programs. Loan funds are reported at estimated realizable value, as it is not practical to determine the fair value of loan fund receivables, which include a large component of federally sponsored student loans. Federally sponsored student loans have significant government restrictions as to marketability, interest rates, and repayment terms. Federal funds are ultimately refundable to the government and are recognized as a liability in the Consolidated Statements of Financial Position (see footnote 5).

The university’s loan portfolio includes over 11,100 individual loans and is geographically diverse. Loans that are made are due on the last business day of the month and are considered past due if the minimum payment is not received within forty-five days subsequent to the due date. At June 30, 2016 and 2015, respectively, 91% and 92% of the parent loans and 79% and 78%, of the institutional student loans were considered current. Income earned on financing receivables is recorded on an accrual basis.
Tuition and Financial Aid

Demonstrated financial need is the major criteria for undergraduate students to receive financial aid. Graduate students often receive tuition support in connection with research assistant, teaching assistant and fellowship appointments. Total financial aid granted to students by the university, including aid provided to employees and their dependents, was $311,863 in 2016 and $294,459 in 2015. The table below identifies student aid by type. Scholarships are reported net against tuition in the Consolidated Statements of Activities. Other amounts are reported as expenses.

Contributions

Contributions, including unconditional promises to give, are recognized as revenues in the period the contribution or promise is received. Contributions received for permanent endowments or perpetual trusts are reported as non-operating revenues. Contributions of assets other than cash are recorded at their estimated fair value at the date of gift and, unless instructed otherwise by the donor, are liquidated upon receipt or as soon as practical thereafter.

Gifts and conditional promises to give are not recognized until the conditions on which they depend are substantially met. Contributions, in the form of unconditional promises to give, to be received after one year are discounted at credit-adjusted tax exempt borrowing rates in accordance with fair value accounting. Pledges outstanding are discounted with rates ranging from 0.58% to 1.53%. Amortization of the discount is recorded as contribution revenue. An allowance is made for uncollectible unconditional promises to give based upon management’s judgment, past collections experience and other relevant factors.

A summary of pledges receivable at June 30 is as follows:

<table>
<thead>
<tr>

Allowance for uncollectible amounts | (5,337)    | (4,913)    |
Total                           | $226,876   | $217,783   |
Patient Services Revenue
The university recognizes revenues in the period in which services are rendered. The university has agreements with third-party payers that provide for payment to the university at amounts that are generally less than its established rates. Accordingly, patient revenue is reported net of contractual allowances, at estimated net realizable amounts from patients, third-party payers and others for services rendered. Also, reported in this caption are cost reimbursements from hospitals for services provided by university personnel in support of the hospital’s clinical activities.

Tuition and Fee Revenue
Tuition and fee revenue, net of scholarships, is recorded in the fiscal year in which the educational programs are conducted.

Auxiliary Enterprises – Sales and Services
Auxiliary enterprises sales and services revenue is recorded in the fiscal year in which earned. This revenue is composed primarily of on and off campus housing charges, dining services, and parking and transportation fees.

Educational Activities – Sales and Services
Educational activities sales and services revenue is recorded in the fiscal year in which it is earned. This revenue is composed of a number of activities including clinical trial revenues, management services and salary reimbursements from affiliated hospitals, consulting, laboratory fees, conference center revenues and revenues from licensing and royalties.

Affiliated Hospital Revenues
Affiliated hospital revenue is recorded in the fiscal year in which earned. This revenue is composed of amounts received from affiliated hospitals for various services as more fully described in Note 10.

Sponsored Programs
The university receives grant and contract revenue from governmental and private sources. Revenue associated with the direct costs of sponsored programs is generally recognized as the related costs are incurred. The university records revenue in unrestricted net assets upon its recovery of direct and indirect costs applicable to those sponsored programs that provide for the full or partial reimbursement of such costs. The recovery of indirect costs, also referred to as facilities and administrative costs is based on negotiated rates and represents recoveries of facilities and administrative costs incurred under grants and contracts agreements. Recovery of facilities and administrative costs of Federally sponsored programs is at rates negotiated with the university’s cognizant agency, the Department of Health and Human Services. The university and the Federal government are currently operating under an agreement that establishes facilities and administrative cost reimbursement rates under Federal grants and contracts through June 30, 2017. The university will submit a proposal for rate negotiation during fiscal year 2017.

Operating Results and Allocation of Certain Expenses
The university’s measure of operations as presented in the Consolidated Statements of Activities includes income from tuition and fees, grants and contracts, medical services, contributions for operating programs, the endowment spending distribution and other revenues. Operating expenses are reported on the Consolidated Statements of Activities by functional categories, after allocating costs for operation and maintenance of plant, interest on indebtedness and depreciation expense. Operating results exclude investment gains/(losses) except for the portion of gains utilized for the endowment spending distribution, permanently restricted gifts, and other non-
operating amounts. Operation and maintenance of plant and depreciation are allocated to functional categories largely based on square footage. Interest expense is allocated based on specific identification of the uses of debt proceeds. Instruction expenses include instruction, departmental research and patient care costs.

Split-Interest Agreements
The university’s split-interest agreements with donors consist primarily of charitable gift annuities and irrevocable charitable remainder trusts for which the university serves as trustee. Assets are invested and payments are made to donors and/or other beneficiaries in accordance with the respective agreements. Contribution revenues for charitable gift annuities and charitable remainder trusts are recognized after recording liabilities for the present value of the estimated future payments to be made to the respective donors and/or other beneficiaries. The discount rate used is a credit-adjusted rate in existence at the date of the gift. The rates used range from 1.26% to 3.13% for 2016 and 1.43% to 3.14% for 2015. Annually, the university records the change in value of split-interest agreements by recording at fair value the assets that are associated with each trust and recalculating the liability for the present value of the estimated future payments to be made to the donors and/or other beneficiaries.

Conditional Asset Retirement Obligation
The asset retirement obligation for the university relates primarily to the removal of asbestos from certain of its buildings. Known asbestos sites are appropriately encapsulated or controlled in accordance with current environmental regulations pending ultimate removal. As of June 30, 2016 and 2015, respectively, $17,139 and $16,746 of conditional asset retirement obligations are included within accounts payable and accrued expenses in the Consolidated Statements of Financial Position. Additional obligations recognized, obligations settled, and accretion expense were not material to results reported in the Consolidated Statements of Activities in any year.

Cash and Cash Equivalents
The university considers cash on hand and in banks and all highly liquid financial instruments with an original maturity of 90 days or less, except those amounts assigned to and invested by its investment managers, which amounts are classified as investments, to be cash and cash equivalents.

Income Taxes
The university is exempt from federal income taxes under Section 501 (c)(3) of the Internal Revenue Code except to the extent the university has unrelated business income or consolidated for-profit affiliates incur taxes. There was no significant provision for income taxes in the current year. The university has no uncertain tax positions that result in material unrecognized tax expense/benefits.
Recent Accounting Pronouncements

During fiscal 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities, which provides targeted updates to the financial instruments classification and measurement standard (Subtopic 825-10). Changes primarily affect accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. This amendment is effective for fiscal years beginning after December 15, 2018 or the university’s fiscal year 2020. A provision of the update, which may be elected early, specifies that a not-for-profit (NFP) entity is not a business entity, and as such ASU 2016-01 eliminates the requirement to disclose the fair value of financial instruments measured at amortized cost. The university chose to early adopt this provision in fiscal 2016. Both fiscal 2015 and fiscal 2016 debt fair value disclosures have been removed from the financial statements.

During fiscal 2016, the FASB issued ASU 2016-02, Leases. The ASU requires lessees to recognize in the Statements of Financial Position for leases with a term of greater that one year, a liability to make lease payments and a right-of-use asset representing its right to use the asset for the lease term. Generally, lease payments will be recognized as interest expense and as a reduction of the liability. The asset will be amortized over the life of the lease. Accounting by a lessor will be largely unchanged from that required by current generally accepted accounting principles. Adoption of ASU 2016-02 is required for the university’s fiscal year 2020. Management is still evaluating the impact to the consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40), Customer’s Accounting for Fees Paid in a Cloud Computing Arrangement. The ASU provides criteria for customers in a cloud computing arrangement to use to determine whether the arrangement includes a license for software. The ASU is effective for non-public companies for annual periods beginning after December 15, 2015, or fiscal 2017 for the university, with early adoption permitted. The university will adopt this Update in fiscal 2017. It is not expected to have a material effect on the university’s financial statements.

During 2014 the FASB issued ASU 2014-09, Revenue from Contracts with Customers. ASU 2014-09, effective in fiscal 2018, affects all contracts entered into with customers that result in a transfer of goods or services or a transfer of non-financial assets. The core principle of the standard is for organizations to recognize revenue in a way that depicts the transfer of goods or services to customers in amounts that reflect the consideration (payment) to which the organization expects to be entitled. Since 2014 the FASB has issued a number of clarifying updates. The university is currently evaluating the impact the adoption of ASU 2014-09 and subsequent updates will have on its consolidated financial statements.

2. Fair Value

The university follows FASB guidance for fair value measurements. This guidance defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.
The FASB guidance establishes a hierarchy of valuation inputs based on the extent to which the inputs are observable in the marketplace. Observable inputs reflect market data obtained from sources independent of the university and unobservable inputs reflect the university’s assumptions about how market participants would value an asset or liability based on the best information available. Valuation techniques used to measure fair value maximize the use of observable inputs and minimize the use of unobservable inputs. The fair value hierarchy is based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value.

The following describes the hierarchy of inputs used to measure fair value and the primary valuation methodologies used by the university for financial instruments measured at fair value on a recurring basis. The three levels of inputs are as follows:

Level 1 Quoted prices in active markets for identical assets or liabilities, such as exchange traded equity securities.

Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the same term of the assets or liabilities. Examples of Level 2 include U.S. Treasury securities and corporate bonds.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

A financial instrument’s categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.
The following table presents the financial instruments carried at fair value as of June 30, 2016, on the Consolidated Statements of Financial Position by caption and by the valuation hierarchy defined above. Amounts measured at net asset value are reported using the practical expedient under ASC topic 820 and excluded from the fair value hierarchy. Included as Level 2 fixed income are U.S. Treasury securities of approximately $314,649.

As of June 30, 2016, it is probable that all of the private equity investments reported as Level 3 above will be sold at an amount different from the net asset value of the university’s ownership interest in partners’ capital. The fair value of these investments has been estimated at the expected selling price of these investments based on sale negotiations in process at June 30, 2016. Other than the transfer of these positions into Level 3, there were no other material transfers between levels during the periods presented. The university recognizes transfers at the end of the periods presented.
The following table presents the financial instruments carried at fair value as of June 30, 2015, by caption on the Consolidated Statements of Financial Position and by the valuation hierarchy defined above. Included as Level 2 fixed income are U.S. Treasury securities of approximately $289,012.

Included as investments on the Consolidated Statements of Financial Position, at June 30, 2016 and 2015, respectively, but not reported in the tables above, are accrued investment income of $3,935 and $4,859 and investments in affiliates of $41,990 and $41,418, which are recorded on the equity basis of accounting. A portion of equity amounts measured at net asset value above as of June 30, 2016 and 2015 are in hedge-type strategies and a portion of real assets are invested in private equity-type structures. Beneficial interests in perpetual trusts held by third parties are valued at the present value of the future distributions expected to be received over the term of the agreement.

Following is a description of the university’s valuation methodologies for assets and liabilities measured at fair value. The methods described below may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the university believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Fair value for Level 1 is based upon quoted prices in active markets that the university has the ability to access for identical assets and liabilities. Market price data is generally obtained from exchange or dealer markets. The university does not adjust the quoted price for such assets and liabilities.

Fair value for Level 2 is based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets. Inputs are obtained from various sources including market participants, dealers, and brokers.
Fair value for Level 3 is based on valuation techniques that use significant inputs that are unobservable as they trade infrequently or not at all.

Investments measured at net asset value primarily consist of the university’s ownership in alternative investments (principally limited partnership interests in hedged strategies, private equity investments, real assets, and other similar funds). The fair values (Net Asset Value (“NAV”) or partner’s capital per share) of the securities held by limited partnerships that do not have readily determinable fair values are determined by the respective general partners and are based on appraisals or other estimates that require varying degrees of judgment. If no public market exists for the investments, the fair value is determined by the general partners taking into consideration significant unobservable inputs including, among other things, the cost of the investments, prices of recent significant placements of investments of the same issuer, and subsequent developments concerning the companies to which the investments relate. Excluding the cost of the investment, significant increases or decreases in the remainder of those inputs could result in a significantly higher or lower fair value measurement. The university has performed due diligence with respect to these investments to ensure NAV or partner’s capital per share is an appropriate measure of fair value as of June 30. NAV calculated by the investee in a manner consistent with generally accepted accounting principles for investment companies is reported as the fair value of the investment.

Valuation and other considerations concerning the major classes of investments are provided in the following paragraphs.

**Equity**

The equity class of investments is globally diversified across public markets including domestic and international developed and emerging market equities. The majority of equity assets are valued at quoted market price in accordance with Level 1 valuation techniques as described above, unless held in hedge-like strategies which are valued at NAV as described above.

**Fixed Income and Short-Term Investments**

Investments in this class include domestic and international nominal fixed income instruments. Fixed income investments are held principally as liquid vehicles for operating needs and as a source of diversification. A significant component of non-endowment fixed income investments is held in highly liquid funds. The valuation of these funds is determined using a market approach in accordance with the techniques for Level 2 as described above.

**Hedged Strategies**

Investments in hedged strategies are made in sub-strategies including event driven, distressed/credit, relative value, long/short equity, and global macro funds. The redemption frequency for these funds varies from monthly to every two years. Similarly, the required redemption notice period varies from three to ninety days. The total fair value of hedged strategies, including equity and fixed income investments with a hedge fund structure, held at June 30, 2016 and 2015 was $2,481,728 and $2,669,038, respectively. Of this amount, $183,796 and $197,733 at June 30, 2016 and 2015, respectively, were in “side pockets” and other similar restricted investments with indeterminate redemption periods. Another $67,232 and $162,537 were subject to initial investment lock-ups that expire over 3 to 13 months and 1 to 19 months as of June 30, 2016 and 2015, respectively. Some funds subject to lock-up permit early redemptions subject to a fee. At June 30, 2016, the university had commitments outstanding of approximately $52,745 for hedged strategy funds.
Private Equity
Investments in private equity strategies are made in targeted categories including buyout, venture capital, and corporate finance. Redemptions of such funds are not permitted and distributions are received as underlying investments are liquidated. Generally, the remaining lives of the agreements under which these investments are made vary from 1 to 15 years assuming all extension options under the agreements are exercised and approved. At June 30, 2016, the university had total private equity investment commitments outstanding of $1,180,687, but only a portion of this amount is expected to be funded in 2017.

Real Assets
Investments in the real assets class are made in targeted categories including natural resources and real estate. Such accounts represent approximately 7% of total investments. The majority of these assets are not held directly but are held in private-equity-type structures that invest primarily in real estate and natural resources. These funds are valued at net asset value as described above. Generally, the remaining lives of the agreements under which these investments are made vary from 1 to 14 years assuming all extension options under the agreements are exercised and approved. At June 30, 2016, the university had total real asset commitments outstanding of $313,900, but only a portion of this amount is expected to be funded in 2017.

3. Investment Return
The following summarizes the return on investments. Investment income represents earnings on non-endowed funds. Return on investments is presented net of investment management fees. Certain investments, including some but not all of those in the hedged and private equity categories, report investment returns net of fees. Other fees paid directly to investment managers and internal investment management costs were $54,378 and $47,317 for 2016 and 2015, respectively.

</table>

At June 30, 2016 and 2015, investments with a fair value of $42,125 and $35,484, respectively, were loaned to various brokers on an open-ended basis for average periods varying from several days to several months, depending on the type of loan. The university receives lending fees and continues to earn interest and dividends on the loaned securities. These securities are returnable on demand and are collateralized by cash deposits or U.S. Treasury securities amounting to 104% of the market value of the securities loaned at both June 30, 2016 and 2015. The university is indemnified against borrower default by the financial institution that is acting as its lending agent.
The borrowers provided $43,820 and $37,068 of collateral in the form of cash or U.S. Treasury securities for the loaned securities at June 30, 2016 and 2015, respectively, and is reported in Deposits, advances and other on the Consolidated Statements of Financial Position. Most, if not all, of the cash is reinvested in other vehicles by the lending agent. Such collateral was invested in fixed income securities and had a fair value of $43,845 and $37,089 at June 30, 2016 and 2015, respectively, and is reported in Other assets on the Consolidated Statements of Financial Position.

4. **Endowment**

The state of Missouri has adopted legislation that incorporates the provisions outlined in the Uniform Prudent Management of Institutional Funds Act (UPMIFA). The statutory guidelines contained in this legislation relate to the prudent management, investment, and expenditure of donor-restricted endowment funds held by charitable organizations. Additionally, the legislation specifies factors for fiduciaries to consider prior to making a decision to appropriate from or accumulate into an institution’s endowment funds.

At June 30, 2016, the university’s endowment consists of 3,271 individual donor-restricted endowment funds and Board of Trustees or management-designated endowment funds for a variety of purposes plus split interest agreements and other net assets where the assets have been designated for endowment. The net assets associated with endowment funds, including funds designated by the Board of Trustees or management to function as endowments, are classified and reported based on the existence or absence of donor-imposed restrictions.

The university has interpreted Missouri UPMIFA as requiring the preservation of the original gift as of the gift date of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, the university classifies as permanently restricted net assets, (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted until the donor-imposed stipulations attached to those amounts have been met by actions of the university and/or passage of time and appropriated for expenditure in a manner consistent with the standard of prudence prescribed by UPMIFA.

</table>

During 2016, the university determined that reductions to endowment net assets resulting from the endowment spending distribution component of the Treasurer’s Investment Pool allocation were not properly classified as unrestricted and temporarily restricted net assets of the endowment in prior years. As a result, the 2015 beginning unrestricted and temporarily restricted endowment net assets as well as the 2015 allocations of endowment return to the treasurers investment pool have been revised. Management does not believe that the impact of this prior year revision is material. These revisions did not affect the consolidated statements of financial position, activities or cash flows.

Of the amount classified as temporarily restricted endowment net assets, $2,336,202 represents the portion of endowment funds subject to time restrictions under Missouri’s enacted version of UPMIFA.

### Permanently Restricted Net Assets

The portion of perpetual endowment funds net assets that is required to be retained permanently by explicit donor stipulation:

Endowment Funds With Deficits
As determined under UPMIFA, the fair value of assets associated with individual donor-restricted endowment funds may fall below the value of the initial and subsequent donor gift amounts (i.e., deficit). When donor endowment deficits exist, they are classified as a reduction of unrestricted net assets. Deficits of this nature reported in unrestricted net assets were immaterial as of June 30, 2016 and 2015, respectively. The deficits resulted largely from unfavorable market fluctuations that occurred shortly after the investment of newly established endowments.

Return Objectives and Risk Parameters
The university has adopted endowment investment and spending policies that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of endowment assets. Under this policy, the return objective for the endowment assets, measured over a full market cycle, shall be to meet or exceed the return of its policy benchmark, based on the endowment's target allocation applied to the appropriate individual benchmarks. The university expects its endowment funds over time, to provide an average rate of return that will exceed the sum of inflation and the spending rate. Actual returns in any given year may vary from this amount.

Strategies Employed for Achieving Investment Objectives
To achieve its long-term rate of return objectives, the university relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized gains) and current yield (interest and dividends). The university targets a diversified asset allocation that places greater emphasis on equity-based and alternative investments to achieve its long-term objectives within prudent risk constraints.

Endowment Spending Allocation and Relationship of Spending Policy to Investment Objectives
The university has an endowment spending distribution policy designed to stabilize annual spending levels and preserve the real value of the endowment over time. Under this policy, earnings of the pooled endowment are distributed at a rate set annually to the schools and other units of the university. Consideration is given to the provisions of UPMIFA in determining the amount to appropriate. This spending rate must fall within the range of 3.0% to 5.5% of the five-year average market value of a unit of the pooled endowment. For 2016, the spending rate from the pooled endowment was 4.2% of the beginning market value of the pooled endowment. The spending rate is funded from current earnings and, in years when current earnings are insufficient, from previously accumulated earnings of the endowment.
The university’s endowed assets at June 30 are as follows:

</tbody>
</table>

The university is exposed to credit risk on amounts receivable from student and parent loans. Parent loan funds are offered by the university as a way for parents to finance their children’s education at a fixed rate. Institutional student loans are offered by the university based on financial need. Both parent and institutional loans typically have ten year terms and, in the case of parent loans, existing economic conditions are evaluated annually in determining the interest rates for these loans. Government sponsored student loans carry minimal risk for the university.

The principal credit quality indicator used by the university for the portfolio of non-government student and parent loans is collection experience. In order to reduce its credit risk, the university has adopted credit policies which include a review of credit limits and maintaining an active collections process with the assistance of third party collection agencies as necessary. At June 30, 2016, the allowance for parent and institutional student loans was $4,571 compared to $4,480 at June 30, 2015. Accounts are considered past due if a scheduled payment is forty-five days late. The balance in such accounts was $8,407 and $8,413 at June 30, 2016 and June 30, 2015,
Washington University
Notes to the Consolidated Financial Statements
Years Ended June 30, 2016 and 2015

(All amounts in thousands of dollars)

respectively. Allowances are established based on management’s best estimate of exposure at June 30 and are influenced by historical losses, existing economic conditions, and the current payment activity on loans. Activity in these allowances was not significant.

Parent loans and institutional student loans are sent to a third party collection agency if the loan is past due for a period of time and the university has been unable to collect payment. As these loans are non-dischargeable in bankruptcy, accounts are not typically considered uncollectible until all collection efforts have been exhausted with no receipt of payment. At this time, a loan will be written off.

6. Notes and Bonds Payable

Bonds payable are redeemable at the option of the university at various times from 2016 through 2055. The university is required to maintain certain ratios and comply with other restrictive covenants principally that the university maintain a ratio of expendable financial resources to debt of at least 1.25 times. The university is in compliance with this covenant. During 2016 and 2015, interest, accretion of debt discount and related fees incurred on notes and bonds payable totaled $55,174 and $54,693, respectively.
(All amounts in thousands of dollars)

Maturities on notes and bonds payable for the next five fiscal years are as follows:

<table>
<thead>
<tr>
<th>Year</th>

</tbody>
</table>

During fiscal 2016, the university issued $402,920 of taxable Series 2016 bonds. $274,995 of net proceeds from the issuance and other funds were placed in an irrevocable trust to be used to satisfy all interest and principal payments, including principal to be paid at the first scheduled call date, for $230,995 of the 2007 Series A and B Missouri Health and Educational Facilities Authority (MOHEFA) Bonds and $44,000 of the 2008 Series A MOHEFA bonds. In accordance with the terms of the MOHEFA Bond indentures and loan agreements, establishment of the trust results in the legal defeasance of the university’s obligation under the bonds. The transaction was accounted for as an extinguishment with a recognized loss of $6,176 reported on the Other line of the Consolidated Statements of Activities.

During fiscal 2015, the university issued $131,435 of taxable Series A bonds. $130,561 of net proceeds from the issuance and other funds were placed in an irrevocable trust to be used to satisfy all interest and principal payments, including principal to be paid at the first scheduled call date, for $48,250 of the 2001 Series A Missouri Health and Educational Facilities Authority (MOHEFA) Bonds and $78,500 of the 2004 Series A MOHEFA bonds. In accordance with the terms of the MOHEFA Bond indentures and loan agreements, establishment of the trust results in the legal defeasance of the university’s obligation under the bonds. The transaction was accounted for as an extinguishment with a recognized loss of $2,809 reported on the Other line of the Consolidated Statements of Activities.

The university has other lines of credit, which generally expire annually, aggregating $264,015, of which $214,784 is available at June 30, 2016. The university expects that these lines of credit will be renewed but can make no assurances.

7. **Derivative and Other Financial Instruments**

In accordance with the university’s investment policies, derivative instruments may be purchased and sold to manage the risk and return of investment market positions. Investment managers purchase and sell derivatives on various fixed income instruments to control the risk of fluctuations in interest rates, relative to portfolio benchmarks, on the university’s fixed income investments. Certain equity investment managers purchase derivatives to obtain cost efficient exposure to equity markets or to hedge currency. These contracts are valued at periodic intervals (daily, monthly, quarterly, etc.) as well as at June 30, with the resulting changes in the values of the contracts either added to or deducted from the university’s custodial account. In addition, derivative transactions (primarily futures, options and swaps) can be entered into using a derivatives administrator for multiple purposes including hedging, rebalancing or tactical trading. Hedging derivatives are utilized in the event that the university determines that the endowment should hedge market exposures. Rebalancing derivatives are utilized to synthetically adjust the university’s investment allocation towards its policy allocation. Tactical trading derivatives are utilized to implement a view that the university may have on a particular market. Derivative activity, when initiated by the
university, is executed, settled and managed by the derivatives administrator on a non-
discretionary basis. Such instruments are not designated as hedges for accounting purposes. Gains
or losses from these derivative instruments are reported as realized and unrealized gains or losses
in the Consolidated Statements of Activities. The contracts and gains or losses they generate are
not material to the university's consolidated financial statements.

The university has investments in certain funds, generally in the form of limited partnerships that
participate directly, or have the option to participate, in derivative instruments. The university
regularly reviews the performance of these funds in the context of its overall investment objectives.

In order to reduce exposure to floating interest rates on variable rate debt, the university entered
into a thirty-year interest rate swap agreement in 2004. The agreement, which was terminated
during 2015 at a gain of $2,056, had the effect of fixing the rate of interest on borrowings at
approximately 4.26% for $78,500 of debt.

8. Commitments and Contingencies

At June 30, 2016, the university had outstanding commitments under certain construction
contracts in the amount of $71,395, the majority of which will be payable during the year ending
June 30, 2017.

The university maintains a self-insurance program for professional liability. This program is
supplemented with commercial excess insurance above the university’s self-insurance retention.
Funding for the program reserves is based on claims made. The assets supporting the funded
reserve are reported as investments in the Consolidated Statements of Financial Position. The
university also accrues for an estimate of claims incurred but not reported. Reserves, funded and
unfunded, are based upon actuarial studies and represent undiscounted estimated claims and
related costs. The total self-insurance reserves at June 30, 2016 and 2015, respectively, were
$79,107 and $83,379. Self-insurance reserves are necessarily estimates based on historical loss
experience and other factors, and while management believes that the reserves are adequate, the
ultimate liabilities may be in excess of or less than the amounts provided.

The university is a party, along with other universities, to an agreement with a reciprocal risk
retention group for purposes of obtaining general liability and auto liability insurance coverage in
excess of a pre-determined retention level. Under the terms of these agreements, the university can
be called upon to make additional capital contributions. In management’s view, any such capital
calls would not be material.

The university is involved in various legal proceedings arising in the normal course of operations.
Although the outcome of any legal proceeding cannot be predicted with certainty, it is the opinion
of the university’s management that the outcome of these proceedings individually or in the
aggregate, will not have a material adverse effect on the business, Consolidated Statements of
Activities, financial position or liquidity of the university.
9. Retirement Plan

The university provides its faculty and staff with a defined contribution (403(b)) retirement savings plan in which employee contributions, university contributions and investment earnings accumulate to assist employees at retirement. Participating employees own individual retirement accounts through the Teachers Insurance and Annuity Association (TIAA), College Retirement Equity Fund (CREF), and/or the Vanguard Group, Inc. Under this arrangement, the university and plan participants make monthly contributions to TIAA-CREF and/or Vanguard. During 2016, the university consolidated custody of retirement plan assets and administration of annuity contracts under TIAA-CREF. For employees who were benefits eligible as of August 31, 2006, the amount of contribution made by the university, commencing after two years of eligible service, is based upon the employee’s age and salary. For benefits-eligible employees hired or rehired after August 31, 2006, the university contribution commences after two years of eligible service and is based upon the employee’s years of eligible service and salary. Vesting provisions are full and immediate. The university’s share of the cost of these benefits in 2016 and 2015 was $72,383 and $69,716, respectively.

10. Agreements With Affiliated Hospitals

The university has affiliation agreements with Barnes Jewish Hospital (BJH) and St. Louis Children’s Hospital (SLCH), collectively the Hospitals. This includes operating activities of Barnes Jewish Hospital at Barnes Jewish West County Hospital (BJWCH), Barnes Jewish Orthopedic Center (OC) in Chesterfield, the Siteman Cancer Center – South County, and the Children’s Specialty Care Center in Town and Country.

The terms of the affiliation agreements provide for the university to be responsible for providing professional medical staff and direction, supervision of residents and interns, appropriate resources for research and medical education, and participation in joint clinical planning. BJH and SLCH are responsible for the hospitals and health care delivery facilities. BJH and SLCH compensate the university for services provided by the university through a fixed annual base payment (adjusted annually for inflation) and an additional contingent payment equal to a share of the combined BJH and SLCH adjusted net operating income. The combined revenue is reported as affiliated hospital revenue on the Consolidated Statements of Activities. In addition, the university derives revenue from patient services provided at Barnes-Jewish at St. Peters Hospital under an agreement with that hospital and BJH. During 2013, BJH agreed to fund on a cost-reimbursement basis over a period of years, certain expenditures by the university. Payments of $11,723 and $39,493 were received or accrued as gifts on the statements of activities under the agreement during 2016 and 2015, respectively.

11. Subsequent Events

The university has performed an evaluation of subsequent events through September 27, 2016, which is the date the consolidated financial statements were issued. In August 2016, the university issued $272,750 of revenue bonds through Missouri Health and Educational Facilities Authority (MOHEFA). The bonds bear a fixed rate of 3.086% and will mature on September 15, 2051. The proceeds of these bonds will be used to refinance Series 2008A and Series 2009A.
